Ajout de Vanity URL (pretty url) pour les URL générées par Sites:

http://www.function1.com/2012/11/how-to-use-vanity-urls-in-the-gsf-with-webcenter-sites/
Installing the GST.

The problem is that the URL Assemblers have to run on Remote Satellite Server, which means *no database access*.

Setup de l'URL Assembler

Interêt de la version 11
